If any player experiences dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE AND CONSULT YOUR DOCTOR BEFORE RESUMING PLAY.

- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

Object
The object of the game is to change all the cubes to the same color. Pay close attention to the Opening Level animation, as some of the Levels might require you to jump on a cube more than once to change it to the target color. The target color for each Level will be displayed on the screen during play.

How to Play
The player changes the top cube colors by hopping Q*bert™ onto the desired cube while avoiding all enemies. All green objects or enemies can collide with Q*bert™. If an enemy collides with Q*bert™, you will lose a life. Jump onto the floating Discs to get away from any enemy that might be chasing you, and always stay on the pyramid. If you jump off the edge without landing on a Disc, you will lose a life. If you jump onto a Disc and Coily follows you off, not only will he be history, but also the Level will be cleared of all present enemies.

The Adventure Game

Q*bert's™ home world and friends have been kidnapped by his archenemy, Coily! In the Adventure Game, you must lead Q*bert™ on a wild cube-hopping adventure to save the day, and find four pieces of the Magic Disc scattered throughout the Dimensions in order to put an end to Coily's dastardly deeds!

To Begin
Q*bert™ begins his adventure at the Dimension Vortex Screen. Using the D-Button, choose the Dimension, Level, and game-play degree of difficulty you wish to play. Press the A Button when finished. When you first start the game, only the Z!La Dimension will be available. If you complete all the Levels in the Z!La Dimension, the next Dimension will become available for play.

Object
The object once again is to change the top color of all the cubes. Pay close attention when Q*bert™ first appears on the screen. The target colors on the Board will flash momentarily. Some Levels may feature two target colors within the same Board. To complete the Level, you will need to change all of the designated cubes to the target color.

Note: Lives do not carry over from one Level to the next. All Q*bert™ lives left over at the end of a Level will be exchanged for points.
Lives and Difficulty
The Difficulty Level you select at the start of each mission will determine how many lives you will have for that Level. The harder the Level, the more points you can score.

Rank
During the game, you will notice cubes that feature the number 2 or 3. These are Rank Cubes, which are special areas that you can access if your score is high enough. Hopping onto these Rank Cubes is not necessary to finish the final game.

Note: If you are Rank 2/3 when you enter a Level, you must complete all of the Rank Cubes areas to finish that Level. On the Vortex Selection Screen your Rank number will be displayed in the cube that Q*bert appears on.

Bonus Rounds
These special play areas can be found throughout all the Dimensions. When these areas are visible, the word "Bonus" will appear on the screen. The goal in the Bonus Rounds is to hop upon all the cubes as fast as possible. In these areas you will not lose a life.

Secret Levels
These hidden areas are scattered throughout the game.

About the cubes
You will discover a variety of different cubes throughout the Q*bert™ Levels. Some simply need to be changed to the target color, while other feature enemies that need to be eliminated. There are also cubes that allow you to score points, and those that transport Q*bert™ to new locations.

Know Your Enemies
A variety of enemies inhabit Q*bert’s™ world. These include:

Coily
This purple snake will relentlessly pursue Q*bert™ until he catches him. Use a Disc to get away from Coily. If you jump onto a Disc at just the right time, this pesky snake will leap off the edge of the pyramid and clear the Board of all enemies.

Ugg and Wrong Way
These two creatures travel on the sides of the cubes rather than on the top of them. Q*bert™ should avoid these two at all costs.

Enemy Balls
Balls will always come from the top of the pyramid and bounce their way down, eventually falling off. Stay out of their way to keep Q*bert™ safe.

Slick and Sam
Slick and Sam like to make trouble by hopping on cubes and changing their color. Q*bert™ must then change the cubes back to the correct color. The only way to stop them is to land directly on them.
**Power-Ups**

During the game you will find various Power-Ups. You simply need to collide with these items to place them in your inventory. However, you can only carry one Power-Up at a time. Pressing the **A Button** will activate most Power-Ups.

- **Build**
  - This Power-Up causes AIBoL to build cubes.

- **Destroy**
  - This Power-Up causes AIBoL to destroy cubes.

- **Invulnerable**
  - This will make Q*bert™ invincible for a few seconds.

- **Green Ball**
  - Colliding with this will cause all the enemies to freeze.

- **Key**
  - This allows Q*bert™ to open doors and cages.

- **Speed**
  - This makes Q*bert™ move faster.

- **Sun**
  - This Power-Up blows all of Q*bert’s™ enemies off the screen.

- **Water Ball**
  - Colliding with this makes Lava Balls evaporate.

- **Smart Bomb**
  - This bomb kills all enemies.

- **Whack Coily**
  - This causes ZILa to enter the screen and dispel Coily with a spell.

- **Torch**
  - Colliding with this illuminates the current World.
The Different Dimensions

Each Dimension in Q*bert™ features 6 Levels of play. You can go back to a Level at any time to try and increase your score. Q*bert’s™ World is comprised of the following Dimensions:

**Z!La Dimension**
The Q-World magician Z!La will help you get through this Dimension. Follow him if you can, or watch for his clues. If you do well here, he might give you a Power-Up.

**Triplets Dimension**
Here, Q*bert™ must try and catch these little guys before they get themselves, and Q*bert™, in trouble. Follow the Triplets and catch them to clear any obstacle barring your way.

**AIBoL Dimension**
AIBoL is the Q-World engineer. He lives to build and blow things up. Use the Build and Destroy Power-Ups while AIBoL is on the screen. Here, jump on switches to make things happen, or try hopping into a cannon or a teleporter.

**Q*Dina Dimension**
Here, help save Q*dina from Coily’s clutches. First, finish all Levels of the Board to reveal a path to Q*dina. Then, find the Key and bring it to Q*dina’s cage to set her free.

Going Head-To-Head

In Head-to-Head Mode, it’s Q*bert™ versus Q*dirk! Each competitor can concentrate on either collecting points or getting to the end of each wave. Cubes in Head-to-Head Mode are color-coded. The cubes Q*bert™ should hop on are orange, while Q*dirk’s are blue. Shared cubes are colored green. Players must complete their own color cubes while trying to hop on as many green cubes as possible. A Level will not end until either player has changed his or her own color cubes, and the last green cube is claimed. At that point, either player should hop to their respective Warp Cube to exit.

In head-to-head, scoring as many bonus points as possible will help secure your victory.
The Head-To-Head Cubes

Cubes encountered during Head-to-Head play include:

Qcube
These orange cubes only affect Q*bert™, and only Q*bert™ can hop on them for points. Q*bert™ must change all orange cubes before his exit will appear.

Dcube
These blue cubes only affect Q*dirk, and only Q* dirk can hop on them for points. Q* dirk must change all blue cubes before his exit will appear.

Open
These green cubes affect both Q*bert™ and Q*dirk, and either one can hop on them for points. All green cubes must be claimed before the exit will appear.

Emitter Cube
Enemies will land here and roam around the playing field.

Reset Cube
Either Q*bert™ or Q*dirk can reset all non-bonus cubes by hopping here.

Fall Cube
This is a cube that will fall whenever Q*bert™ or Q*dirk jump off of it. These do not need to be hopped on in order to finish a Level.

Coily Spawn Cube
When hopped on, this will drop a Coily enemy in your opponent’s playing field.

Slick Spawn Cube
When hopped on, this will produce a Slick enemy in your opponent’s playing field.

Qdisk
These orange disks are used by Q*bert™ to escape enemies.

Ddisk
These violet disks are used by Q*dirk to escape enemies.

Bonus
Either Q*bert™ or Q*dirk receive a 100 points when landing here. These do not need to be hopped on in order to finish a Level.
Warp
Hop onto this to go to the next wave of game-play. You can only hop on your own color exit. The first player to hop on his or her own exit will receive the bonus points.

Camera
This cube changes the game’s point of view for whichever player lands here.

Spawn Cube
When hopped on, this cube causes more Enemy Balls to appear.

Trigger
This cube sets off an explosion for all Tagged Cubes in the opponent’s playing field.

Tagged
These cubes explode when a Trigger Cube is hopped on.
